

Endless Rain

One dark and gloomy day there were two brother's named Tyler and Oliver. They went out onto the mountain while it was raining. Their mum heard a weather warning, "evacuate the mountains there is a tsunami, flood and rain made of acid".But they didn't.Soon after it actually happened. Their parents had gone out shopping so they didn't know.

When they left the shop Oliver and Rebecca started to drive home. While they were driving there was a tsunami in the nearby Atlantic Ocean made of acid. Miraculously the flooding and the rain ends after a year of destruction. After the blinding beams of the sun woke them up they raced down the stairs to see the sky. They were pleased that they didn't get hurt and rescued a pet dog named Jennifer .
