# Introduction

I will never and I mean never eat a salty plum again salty plums are way too salty and have a gross texture most of all they have a unexpected seed. It's so clear that all salty plums should be removed and deleted from all shops and online shops! I absolutely hate salty plums gross!

Why would anyone even like them?  
Do you like them?

Firstly salty plums are so salty when you finish them your mouth will taste like the sea gross and they they are so salty your mouth with feel prickly after one! Do you want a prickly tongue or not because I know for sure I would never want a prickly tongue it would hurt for days!

Secondly salty plums are so wrinkly too like who would spend \$87 DOLLARS on a wrinkled fruit who please tell me who? When you eat a salty plum it feels like you are touching a old persons face like ewww!

By the way I am not rich enough for one bag of salty plums!

Thirdly salty plums when you bite into one you could brake your teeth ! There's a unexpected seed in the middle of the plum. Image you bite into a plum then you here a crack then you scream ahhhh you broke your tooth you with have to go to the DENTIST and they will rip your teeth out of your head like ahhh! Nobody wants that right?
